

AKOMAINU

# ABOUT **KOMAINU**

KOMAINU (\$kAI) is a decentralized betting platform that was born with the aim of enabling anyone to earn decentralized assets through responsible gambling. KOMAINU itself is the product of the collaboration between optimistic players in the DeFi space — crypto addicts, builders, developers, investors, savers, and users, *just like you.*

Through adequate research, the KOMAINU team has noticed how crypto-based gaming remains an untapped market with massive potential. The possibilities within this ever-changing space together with its technology are almost infinite. And thus, the concept of KOMAINU has been created.

At its core, KOMAINU is more than just a gaming platform on Ethereum; it's a prime opportunity to immerse yourself in the biggest up-and-coming technology available. It is our mission to bring the true power of crypto to a universal audience, ensuring the user is at the heart of all we do, given that we have also experienced being users and gambled just like any one of you. Using social media platforms like Telegram, along with the utilization of AI technology, will pave the way for a platform that will allow users to bet against a specialised bot for various prizes.

Ultimately, KOMAINU (\$kAI) will bring forward the very essence of degen-gambling: decentralized, fair, seamless, but most of all — fun.

MAX EMISSION ————— NO NEW TOKENS WILL EVER BE MINTED

1%  
TAX FOR LIQUIDITY

2%  
TAX FOR MARKETING

2%  
TAX FOR REWARD POOL

# KOMAINU

## GAMES

### COIN TOSS

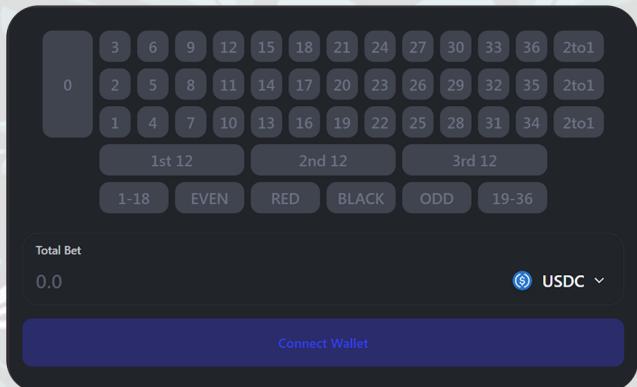

A game where users will be able to bet their \$kAI tokens on a 50/50 coin toss, with odds that are continually verified by our platform. A loss will result to your tokens being transferred to the REWARDS pool, while a win will grant you a 2x of your initial \$kAI bet.

### HIGH STAKES LOTTERY

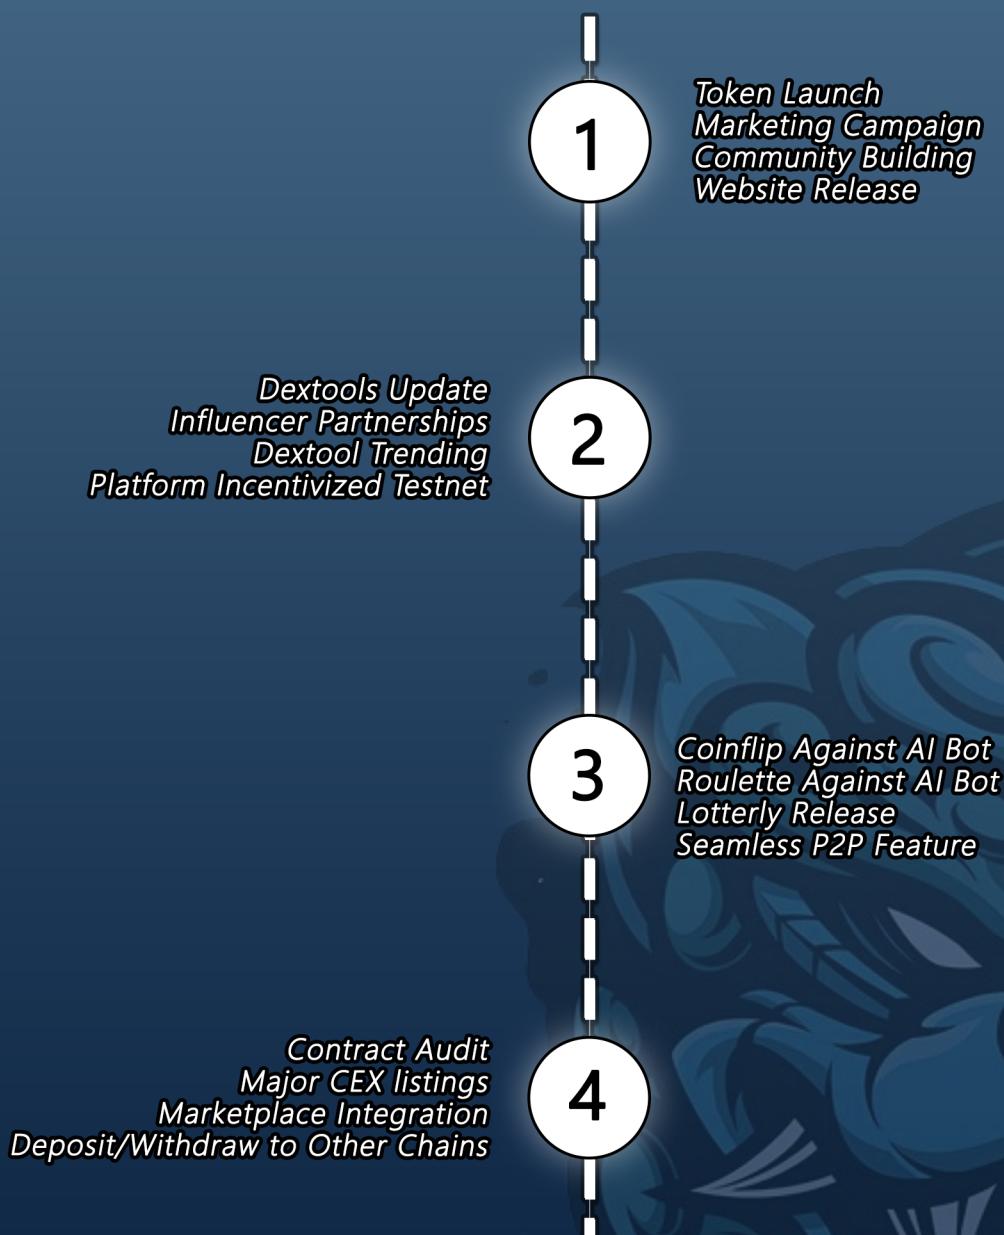

Users will be able to buy lottery tickets for a very small price of \$kAI tokens with the chance to win up to the amount of ETH that is present in on the rewards pool. This automatic lottery will be held every 12 hours, and one lucky holder can be chosen to win for each day.

### ROULETTE

The roulette game will allow \$kAI holders to bet on the numbers that they will choose using \$kAI or USDC. A portion of each (winning or non-winning) trade will go to the reward pool to ensure that the games will remain sustainable for the users.
